How to install mods Mods are an essential part of FC3 Forest that allow for more features to be added into the game. These may be either content that changes the game in some way, or content that just adds color and personality to the world. Any type of mod is available for use in Forest, whether they are games, skins, audio, effects, and more. Once the game is launched, mods are downloaded automatically to your client. They can be found in a separate mods folder and the folder must be completely moved to the "Mods" folder. If you don't want to move the entire mods folder, then you can simply copy a sub-folder of it to the "Mods" folder. Downloading the mods requires the G4rs-R-Me server. If you plan to use an official server, it would be recommended that you download and install the G4rs-R-Me server. This can be done by going to the G4rs-R-Me website and downloading the modpack. On the website, select MODS, then choose to download and install the G4rs-R-Me server. During the download and installation process, the server will automatically update itself, and is fully automated. Once installation is complete, you must restart the G4rs-R-Me server. The server should be available now and ready for use. All officially supported mods in Forest are available in-game via the "Mods" folder. These mods can be installed manually, or automatically. All mods can be found in the "Mods" folder located on the desktop. If you do not have the "Mods" folder on your client, then you can copy one of the mods that is present on your modpack over to the desktop. Depending on the type of mod, you may have to download a specific modpack. Modpacks can be found on the game's website, the G4rs-R-Me website, and inside the "Mods" folder. If you plan to
