Computer and peripheral top 5 cd copy software cargador de dvd.. Casmate Pro 6.52 Windows XP v16.05 e060a90f3f i am very happy.Q: getting the twitter_ids for my friends? I have a friends list in my app and I want to grab their Twitter.com accoungs and get the friends lists they have (if they have one) so I can pull their twitter_ids. I've seen some iOS-SDK examples to do it, but I'm not clear on how it can be done. Has anyone tried doing this yet and if so, do you have any resources for me? A: With recent changes, it is now possible to get authenticated accounts without "verification codes" and one way to do this is to use the AccountStore framework (that Apple released in iOS 4.3) that allows you to call a method like `-[ACAccountStore linkTwitterAccount:completionBlock:]` This method accepts the `account:sTwitterAccount` parameter which is an `ACAccount` object that represents the account with twitter functionality. Here is a good example. It is also possible to get an array `c6a93da74d`
