
ACTIVATE AIO TOOLS Version 3.1.2 |WORK|

r/R is a complete suite of tools for working with R data. It includes frontends for editing data files, introspection of objects, scripting, plotting, visualizing and producing outputs. At its core is the package r/R, which is a complete data-frame and generic data-object manipulation package, and has countless other packages bundled with it such as r/R and its various, converse, used, annotated and related packages. The RASCAA package is a set of tools and utilities for the analysis of association-based clustering results. A variety of tools allow the analysis and visualization of the clustering results using tools developed by GIGA, the group of the Groupe pour l'Analyse et le Traitement Automatique de Grands Arrays (GIGA). RASCAA contains tools for comparing clustering results, clustering-to-gene mapping, clustering with pathway and protein-interaction data, estimating the quality of the clustering procedure. The RASM4 package is a set of tools and utilities for the analysis of association-based clustering results. A variety of tools allow the analysis and visualization of the clustering results using tools developed by GIGA, the group of the Groupe pour l'Analyse et le Traitement Automatique de Grands Arrays (GIGA). RASM4 contains tools for comparing clustering results, clustering-to-gene mapping, clustering with pathway and protein-interaction data, estimating the quality of the clustering procedure. Configure AIO tools for Windows servers Once the file has been downloaded, you should download the PKGMD folder and extract it to the C:\Program Files (x86)\Kube-Vault AIO Tools folder. You can find a manual on the website of the tool. Please follow the instructions carefully to complete the configuration of AIO tools.
