This is a must-have application as it helps you search for and eliminate infected and corrupted files from your hard disk. An essential utility of a PC, Recuva is a tool that enables you to recover deleted or lost files from your hard disk. Unlike most other file-recovery solutions it doesn't need any registry keys or settings in the Windows operating system to perform its functions. Recuva supports a large number of file types such as zip, cab, rar, exe, iso, doc, ppt, swf, pdf, txt, gif, msi, mdb, html, mp3, jpg, ppt, and more. Nagios is a network monitoring software package, which enables the monitoring of network services such as the Apache web server, the DNS server, the file server, the NetBIOS name server, the SMTP server and the NTP server. Nagios runs as a stand alone program and requires monitoring agents to be installed on each host. Are you using Java on your PC? Applying the latest Java updates is a must for software developers and business professionals. But for all those curious to know about Java. Why not download and install the latest Java from Sun? This Java installer makes sure that you will have the latest updates and patches of the Java download, among other things. The BASIC interpreter converts the BASIC source code into a very simple byte code in a format called MARBLES which does not use a stack. This allows the interpreter to work extremely quickly and efficiently, and is why it can start a program in a fraction of a second. With the interpreter being able to run code much faster, it can also pre-process other input such as images, video, and audio files.

Active File Recovery Professional V10.0.5 With Key [TorDigger] Full Version
