Like I said before, the text can be a long way from the point of this. This tool makes a picture that can be used as a template to match up the style of your cover after. Download the program, install it and then click the Modify Type selection. You can also apply the changes to a different image by clicking Edit Image. The new image must be a different format. Most programs create new files and modify the originals in the process. However, the exporter created an image of the image in order to create a template. And that's where the templates come in handy. Modify Type > Page. This form shows up when you click Page, but you can also access this form by clicking File, Modify and then choosing Page. There you will see a list of all the templates that you have created. Click the template you want to use and click Modify. 5ec8ef588b
