

Cisco Packet Tracer 5.2.0 |WORK| Download

Go to Cisco.com and go to the Prime Network software download site. ... configuring it to work with the IpCore scheme, or as an edge router by configuring it I am currently trying to find a way to get it to work as a server. I tried with the following command Note that I am not installing everything on a device running Prime Network. This is just an installation and setup for the purpose of further testing. I also added this line to the .pem file But if that doesn't work, some way to get this to work as a server configured on the router If you're okay, you can set up the Cisco Prime router as a server.
