**Driver J1455 For Windows 10 64-bit ^NEW^**

---

the driver version 17.3.0.0 is a commercial version of the driver. the driver includes the following features:we recommend that you use the device manager to check the version of the driver that is installed on your computer. for more information about the device manager, see debug windows devices and drivers.to install this driver, follow these steps:double-click the downloaded file to start the driver installation.when the installation starts, follow the instructions on the screen.note: this version of the driver is an update of the version 17.1.0 that was released on august 9, 2017. if you have already installed this version of the driver, you can uninstall the old driver. for more information about how to uninstall a driver, see uninstall a driver.the following information is for reference only. it may differ on your system: this article may be useful if you can't obtain a windows hardware quality labs (whql) signed printer driver from the printer manufacturer or from the microsoft windows update web site. it also provides methods to find a printer driver for a printer that isn't supported on your computer that's running a 64-bit version of windows. the redistributable installer for microsoft odbc driver 18 for sql server installs the client components, which are required during run time to take advantage of newer sql server features. it optionally installs the header files needed to develop an application that uses the odbc api. starting with version 17.4.2, the installer also includes and installs the microsoft active directory authentication library (adal.dll).

### **Driver J1455 For Windows 10 64-bit**

unfortunately, there is not much you can do if you are not able to use the integrated camera. if you have an external webcam that is not working with your windows 10 computer, you can try to fix it by adding a new registry value. here's how you can

---

do that:1. open the registry editor a printer that isn't listed in the properties may appear in the windows event viewer.1. select 'windows logs' in the windows menu.2. click 'windows logs' under 'applications and services'.3. click 'applications and services' under 'event viewer'.4. right-click on the printer name under 'applications and services' and select 'open file location' to open the printer's properties. alternatively, click on the printer name under 'applications and services'. \*precaution when using a usb connection disconnect the usb cable that connects the device and computer before installing the driver.connect the usb cable after installing the driver.driver and application software files have been compressed.the following instructions show you how to download the compressed files and decompress them.1. to download files, click the file link, select [save], and specify the directory where you want to save the file.the download will start automatically. 2. downloaded files are saved in the specified folder in a self-extracting format (.exe format).3. double-click the files to decompress them. a new folder will be created in the same folder. the new folder will have the same name as the compressed file.4. double-click the decompressed setup.exe file to start installation. 5ec8ef588b
