# Its Plc Professional Edition Activation Key

---

when your license is activated, you will find the activation code displayed on the licence certificate. you can obtain your activation code from the licence certificate and enter it into the 'activation code' field of the 'aveva edge licensing portal' to start and complete the activation process. you can access the portal with your rockwell account details. once you have signed in, you will need to locate the 'aveva edge' menu on the left side. click on the 'aveva edge licensing portal' item and then click on the 'activate' button. on the following page, you will need to input the activation code located on the back of your licence certificate into the text box provided.

hi i have a windows 8 laptop with an activation key and i want to upgrade it to windows 10. when i enter the activation code i keep getting an error message "the activation key for sage50 is invalid or could not be read. you need to start sage50 on the computer where your sage50 company data resides." can anyone help i have an activation key for windows 10 on my laptop. but when i click on activate, i get the error message "the activation key is invalid or could not be read." when i try to activate the computer with another activation key, it works. what can i do to get this laptop activated? the reason for this error is that the virtual machine didn't have a network connection to the host at the time of the activation. however, once i physically connected the virtual machine to the host, the activation was successful. the first step to activation is to locate the serial number in the footer of the dell emc business unit (bu) system image. this number can be obtained from the bu system manager's system information menu. in the following example, the bu system manager's system information menu is opened. the serial number is displayed in the top right corner.

## Its Plc Professional Edition Activation Key

this is an error coming up: " its plc professional edition activation key "SQLError: ERROR SQL0106N: No process found in the name ".Is it the name of the database server?Is it the name of the database server you selected? I have tried the procedure in the document of activation and the error come up: " its plc professional edition activation key "SQLError: ERROR SQL0106N: No process found in the name ".Is it the name of the database server?Is it the name of the database server you selected?Anybody please help, thanks in advance. A license key consists of a serial number and a software activation code. Both of these parts are unique and are created automatically during the first time the license is used. When the key is first used, the software activation code is generated automatically and can only be redeemed on the device on which the license was originally created. I removed the EFTA software from the VMs, rebooted and then re-installed it. This allowed the software to detect/automatically activate my valid activations. I started the same queue and the resulting files are as follows:- Name: 3140 (VSI. 1 of 3)- Size: 22.4Mb- Output directory: USB- Output file name: 6089-1- Created: Mon, 19 Jul 2018 02:48- Modified: Mon, 19 Jul 2018 02:48 - Source: GeoWeb (1 of 2)- Created: Thu, 15 Jul 2018 12:36- Modified: Thu, 15 Jul 2018 12:36 - Source: GeoWeb (2 of 2)- Created: Thu, 15 Jul 2018 12:36- Modified: Thu, 15 Jul 2018 12:36- Source: RTCGMT- Created: Mon, 19 Jul 2018 02:37- Modified: Mon, 19 Jul 2018 02:37- Destination: OutPut.xml- Created: Mon, 19 Jul 2018 02:48- Modified: Mon, 19 Jul 2018 02:48- Source: OutPut.xml- Created: Mon, 19 Jul 2018 02:43- Modified: Mon, 19 Jul 2018 02:43 - File Type: Executable (application/x-executable)- File Format: ZIP 5ec8ef588b
