
Game Server Toolbox Download 13gb

Hen toolbox is installed but disabled and it tells me to add patches to xmb. . Biggest game file I've ever made, 13GB, took at least 5 minutes. I tried with a 2GB file and it only took 20 seconds but the game won't launch. I also tried to manually run the .exe and that won't run either. How can I fix this or how can I do it. Edit: I tried to run the game directly
