I like this a lot, it uses images and non-sequiter text in the post and most of the time, the autocensored part is non-recognizable. And even if you or a hacker does recognize the word and is able to find out what the topic is about, at least your post is only one sentence long and you can get back to what you were doing, like browsing and downloading songs. So, go download your music! 3Njo.net is very popular and it allows you to check out many online music portals. You should know what youre downloading. Downloading movies that are not in your genre can be easy for movie pirates. Its a casual type of person who downloads these movies to get some extra attention. Theyre really not that bad. So don't take it personally. As mentioned before, when you're downloading music, you should download only your favorite songs. You shouldnt download two different albums of the same artist if you dont like them. You could be downloading an album with lots of songs you dont like. For example, if I wanted to download my favorite albums, I would download Sugarland, Train, Lionel Richie, and Christina Aguilera. That way I only get 4 different songs. If I wanted to download other artists, I would download Mariah Carey, Pink, NSYNC, Eminem, etc. That way, you only download 4 new songs that you dont already have. However, when someone downloads your favorite or ripped songs illegally, they can be really mean. Theyll be like, eewwww thats so wrong. Then theyll be like, oh no dont download Rihanna, thats not a good song. Then another person will see it and be like, oh no, come on, let me see what it is.
