## LS Models LS Land Issue 04 Fairyland Rar

when ice skating ended for the winter, local children could watch the park being constructed as the timber skeleton for the roof, trusses and walls was assembled. a tiny village of colorful buildings was built. plans called for 16 or 18 playhouses. mott estimated that oakland should have about 10, to replace those destroyed by the oakland fires. a final stage would have included a nursery "like a persian rug with a table and chairs" for parents to enjoy. but just eight were completed. one was destroyed by vandalism, and another was scrapped by the city authorities who felt it was too costly to maintain. nevertheless, the little models were enjoyed by children. the arbor day foundation has offered a prize for the best model; winning honors were received in 1978, 1979 and 1982. in recent years, a young boy from flint, mi, has taken up the hobby with enthusiasm. he has been creating models of several of mott's designs. the first his father photographed and has preserved. after the parks department lost control of the conservatory when its museum role was removed, the national park service eventually acquired the site, and funded its restoration and future development as the oakland childrens conservatory museum . during recent years, the renovation included an extensive outdoor reconstruction of the chinese pagoda playhouse and the addition of a small but elaborate mexican playhouse for younger children. the interior of the conservatory itself is open to visitors, by arrangement, and contains some original exhibits from the 1940s. all the original model houses stand, and the oaklands conservatory foundation continues to seek funding to complete the rest of mott's model playgrounds.

---

the fairyland of science, published in 1879, was one of the first books intended to introduce children to science. tossing aside the traditional tales of dragons and fairies, the book instead focuses on the realities of the natural world. it is a small, natural history book, in which the reader learns how to “see” the natural world and

---

how to record what one sees. but the title of the book, the fairy-land of science, suggests that in the natural world, it is not only the task of the scientist to observe, record, and interpret the world around him, but also the task of the child to “discover.” this is not to say that the text is not laden with information, but rather that the book aims to teach children how to learn. the

---

fairylane of science consisted of four chapters that ran through a number of science subjects, including astronomy, magnetism, electricity, and the wonders of photography. the text explains the scientific concepts through a series of examples and is also illustrated with actual photographs of the subjects that are being described. the fairylane of science is a charming example

---

of the popular genre of children's books from the late 1800s that made use of the new medium of photography to illustrate scientific concepts, something that has since become a staple of children's picture books. The Fairyland of Science was first published by the Washington Square Press, a well-known publisher of children's books. It was a popular title, and the first

---

printing of 500 copies sold out in six days. the book was a natural choice for the children of the time because of the great interest that children of this period had in the natural world. if the children of the late 1800s had been taught to see nature as beautiful and interesting, they could have found fairyland of science to be a natural introduction to science. the fairyland of

---

science was illustrated by katharine kincaid. children's interest in science was on the rise. the sunday school movement, as well as the later introduction of the idea of a formal education for children, had made science a popular subject of study. because of this, books like the fairy-land of science were well-received by children and parents alike. today, the book is part of a

---

new trend in children's books:  
nature books. the term "nature  
books" is not new, but it has  
recently become a popular  
category. 5ec8ef588b
