The Canon MP Navigator EX for Canon PIXMA MX340 is not a fully-fledged photo organizer software, but still it has the right tools to perform most of the tasks one might expect of a program of this kind. Those are the functions that can be executed from its 'Import' tab, such as capturing and organizing images from a range of sources, or even turning scanned documents into PDF files, should you not want to make use of the program's built-in scanner. You can also create a virtual scanner by importing documents from flash drives, network shares, or CD/DVDs. Once they have been processed, you will have the choice of converting them to PDF documents, being able to share them via emails, make them available for later printing, and other ways of utilizing them. The application has a well-thought out set of menus that make it easy to use. There are drop-down menus for everything, from editing functions to printing to creating PDF documents. The interface is extremely user-friendly and there are no extra settings that would need to be enabled before using the software.
