Collection of good Cinema 4D plugins - BREEZYSOUND HD Studio The library consists of a special kind of project, which contains the sound production starting from a 3D scene, which is produced in Cinema 4D. Eventually, the sound recordings were edited in Adobe Audition, and then exported with the sound FX plugins. The package comes with 8 bonus sound FX plugins. For those who want to begin with the sound production using Cinema 4D, then BREEZYSOUND should be a good choice, as it provides a wonderful combination of powerful industry standard B&W tools and creative sculpting tools, all into one plug-in. Note that 3D audio effects and tools cannot be used together with CGRAY - see CGRAY (Zhi Chen) product. JOY! - set of audio effects for 3D film and video production The content includes 7 original sound FX plugins with the tools and the sounds you need to create film/video and TV soundtracks. The collection comes with a more than 90 play files for sample. The included plugins include: FAB SYNCER, ACOUSTICSB, DAFS, EFFD, RONAL, PISOLA, SONIC4D, SOUND YCBTECH. The bottom line is: joy! is a collection of plugins which will increase the quality of your project. This collection consists of 2 different projects and the fully compatible version of the Sonic4D plugin. Sonic4D V1: A set of high quality sound effects and cues in a single comprehensive plugin Sonic4D delivers the most realistic sound effects possible in the CINEMA 4D environment. Additionally, it is able to produce dozens of sound effects in an audio track. The Sonic4D plugin is comprehensive in its scope and can be expanded to meet the needs of your project. The included tools are provided by the Sonic4D team and based on professional sound editing software such as Fabfilter, Fabfilter Pro Q, Sound Forge, Waves, Soundtrack Pro and many others. The plugin is compatible with Cinema 4D R20+. Sonic4D is a standalone product and does not require the Cinema 4D plug-in. CINEMATIC: Soundtrack Pro Synth
