Denoising and in-painting isn't easy, but a new Bilateral filter does a superlative job on small areas of damage or banding. Deblurring and making skies in particular look bluer are easier than ever before, thanks to the new Neuromantic Blur filter. Yet, Photoshop rasters are now much more suitable for working on images and the file output is optimized for landscapes. The main view for these photos is a 3:2 ratio, which is very useful when you shoot outside. Speaking of editing a film, you can apply the same technique and process to everything.
