Here's Why the 'Amazon's Own Smartphone' Will Dominate the Market I like the idea of the Amazon.com (NASDAQ: AMZN) Android smartphone. It would change the way we use electronics. The Kindle Fire is an option, but its primary purpose is to be an ebook reader and a web browser. It's great, but not as great as something that is a phone, a tablet, an MP3 player, and a Kindle reader all in one. The Kindle Fire is great for the very small niche of people who don't use any of the other Amazon devices. I know those people, and I also know a lot of people who won't care about the Kindle Fire because they already have one of the competing tablets. The Kindle Fire has what is arguably a truly revolutionary feature, which is the price. It's pretty much free. The Kindle Fire is a hit because it's priced to sell. People will find out they want one. But it's not going to sell
