What's New In IconLock?

With IconLock, you can quickly configure your desktop to your liking and lock the screen resolution. IconLock can lock the desktop resolution as well as the desktop content to make sure your desktop always looks good. If you run multiple applications at the same time, each application will use its own desktop resolution. When your computer display changes, icons may lose their positions and you need to move them back again. With IconLock, you can lock your desktop resolution and its content, so you can always use the same desktop resolution as you wish. If you are playing a game, you can use your game resolution, but the icons will be locked at your desktop resolution to make sure your desktop always looks good. With the Unlock feature, IconLock can lock the desktop resolution automatically as soon as your computer display changes. In other words, when your computer resolution changes, IconLock will be automatically unlocked and you can use the desktop resolution you want. Another handy feature of IconLock is the Save as option which let you save a desktop layout. You can save a layout by choosing an existing layout name, or you can simply input a layout name. If you want, you can also lock the desktop resolution or even the desktop content. This way, you can have different layouts for games and personal use. You can also lock the desktop or the icon positions. With the Tray icon, you can easily lock the desktop resolution and the desktop content, or you can unlock the desktop resolution. It is also possible to lock all the desktop files and folders, common dialogs, icons and IconLock data files. IconLock also can lock the Taskbar, which can be very useful if you want to use the same Taskbar position when playing a game and when using your computer for personal use. You can lock the Desktop, the Taskbar, all desktop files and folders, common dialogs, icons and IconLock data files. The help screen has a list of feature descriptions which can help you to use the app effectively.
