Koukaam Device Discovery Crack+ PC/Windows

This is a small, but functional tool that can help you discover and locate IPCorder devices on your network. All you need to do is just to click the 'Find Devices' button and it will show you all IPCorder devices on your network. If you click on one of them, you can choose to locate it or configure it with the corresponding buttons. Flexible to use It is fairly easy to use Koukaam Device Discovery as it comes with a minimalist user interface. All you have to do is click the 'Find Devices' button, choose your network interface (such as Ethernet, Wi-Fi or VPN), then wait for the program to successfully discover the IPCorder devices. After that, you can simply click on any IPCorder device to locate or configure it. You can also locate IP Cameras by scanning through the applicable network ranges. Why use Koukaam Device Discovery There are numerous problems in getting the IP Camera up and running. If you have your own IPCorder Camera, you are likely aware that its name is not visible on your network and there is no way for you to locate or configure it. That's why Koukaam Device Discovery is a fantastic tool that is ideal for those who have this kind of camera. By making use of Koukaam Device Discovery This is a great tool that is ideal for those who have their own IPCorder cameras. The device's name is not visible on the network, so you have to search for it by using its manufacturer, make and model.

What's New In Koukaam Device Discovery?

Koukaam Device Discovery is a handy utility that can help you identify, locate and configure IPCorder devices on your network. No installation required Unlike other programs that come with a manual or a user guide, Koukaam Device Discovery only requires an unpacking, launching, and running of its executable. All other files and folders are completely unmodified and, in no way, interfere with your Windows registry. Moreover, it does not add any extra files or folders to your computer, nor tamper with your Windows registry, thus, you can run it from removable storage media such as USB flash disks, external hard disks, etc. Find, locate and configure IPCorder devices To help you locate and configure IPCorder devices on your network, Koukaam Device Discovery comes with the Find Devices tool. Find IPCorder devices on your network You can use this tool to locate IPCorder devices on your network, as it scans your connected networks looking for IPCorder devices. Configure IPCorder devices Once you have selected a device that you would like to

configure, Koukaam Device Discovery features the ability to do so. Simple, user-friendly interface Although Koukaam Device Discovery features a minimalistic, user-friendly design, it packs a handful of features, which are neatly organized. Features No installation required The program doesn't require a separate installation, as its executable resides inside a self-extracting archive, that you can run without it. Portable Since the program is portable, it does not leave behind any files or folders to your computer, nor changes any of its registry settings. Simple, user-friendly interface Just like Koukaam Device Discovery, its interface is also minimalistic, allowing you to do almost everything you need to do, without having to make extensive efforts. Lightweight and portable The application comes with an intuitive, easy-to-use design, that allows you to work with it without getting in your way. Small size and minimal time-wasting This application is lightweight, as well as portable. With a size of approximately 57 Kb, the program does not consume significant disk space. IPCorder device discovery and configuration Koukaam Device Discovery can identify and configure IPCorder devices on your network. It requires no installation. IPCorder device discovery You can use this tool to locate IPCorder devices on your network, as it scans your connected
