It wasn't long ago that Adobe launched an update that meant users didn't need to worry about resources draining when they used Illustrator or the rest of their Creative Cloud apps. Now that we've been on Creative Cloud for a few years, we're looking forward to being able to stop worrying about computer hard drives getting full of stuff. However, the downside is that Illustrator and Photoshop now require an annual subscription to the Creative Cloud instead of annually recurring \$399 to \$699 to buy. Thankfully, there are ways around this. Adobe lets you download a copy of these apps for personal or commercial use. If you want to save on the costs, however, it's best to decide which software is quicker to learn and

more efficient for your projects. That way, you get the best of both worlds. While we're not huge fans of Photoshop, we realize that Photoshop has a certain charm to it, and you can't take that away from Adobe. However, we would encourage readers to carefully consider each feature they use or enjoy before they commit to a \$700 yearly bill. Let us know what you think in the comments below!
