Video To GIF Download For Windows

Video to GIF is a simple and user-friendly application that can help you quickly generate GIF animations from your videos. Thanks to its intuitive interface, this tool is quite pleasant to work with. In order to create a GIF file from your movie, you first need to select the video you want to convert. In addition, you can view it in the main window of the application, thanks to its built-in player. From the main window of Video to GIF, you can also set custom width and height values. In addition, you can select an interpolation method for resizing, namely 'Smooth', 'Sharpen' or 'Sawtooth'. Consequently, you can set the output rate, in other words the number of frames per second that you want to create. By adjusting the slider under the video player, you can determine the length of the output GIF along with the number of generated frames. In what concerns the output preferences, Video to GIF allows you to create a regular GIF or a TV Wall, which basically means that all the extracted frames are positioned in user-defined rows and columns to create a single image. Furthermore, Video to GIF provides you with a set of image 'Effects', such as 'Black and White', 'Emboss', 'Invert', 'Blur', 'Noise', 'Blue' or 'Green', that you can use on your GIFs. The 'Output Preview' section enables you to select the file format of the converted video, offering you a choice between GIF, JPG, TIF, BMP or PNG. Here, you can also choose the image quality and the destination folder for the generated item. Moreover, you can preview how your converted video would look like, thanks to the built-in player. The settings can also be saved under the 'Settings' button. Video to GIF Key Features:
