

TibiaME Bot.rar

Latest release: Update 624 Connecting to. go back to the official server at zip - start the bot's installation. If you already have Tibiame BOT installed. Q: How do I make a database call within a DLL for Silverlight in .Net Framework 4.0? I have a DLL for a Silverlight application that has a database call in its signature. I am updating to .Net Framework 4.0, but what changes will I have to make to the code in order to get it to run without an exception? The code: public sealed class MyDll { [DllImport("MyDll.dll")] public static extern void DatabaseMethod(string where, string value); } A: In .Net 4.0 things in Silverlight get a little more complicated. You have to include a reference to the .Net Framework 4 Client Profile. This includes the System.Data.DataSet. The System.Data assembly includes the DataSet class, but not the DataSetReader or DataSetWriter classes that were removed in .Net 4.0. You will have to call System.Data.DataSet.ReadXml() to load the data and DataSet.ReadXmlSchema() to check the schema. Here's a list of the supported .Net 4.0 client profile assemblies: System.Data, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b77a5c561934e089 System.Data.DataSet, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b03f5f7f11d50a3a System.Data.DataSetExtensions, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b03f5f7f11d50a3a System.Data.Xml, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b77a5c561934e089 System.Xml, Version=4.0.0.0, Culture=neutral, PublicKeyToken=b77a5c561934e089 System.Xml.Linq, Version=4.0.0.0, Culture=neutral, Public
